SHAHBAZ AHMED

FULL STACK DEVELOPER | REACT · NEXT.JS · NODE.JS · MONGODB

Hyderabad, Telangana | +91 9060725446 | shahbaz126ahmed@gmail.com | GitHub | LinkedIn profile URL to be added

PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of professional experience building and deploying web applications using React, Next.js, JavaScript, REST APIs, and Supabase. Experienced in reusable UI development, authentication integration, and frontend performance optimization. Built full-stack projects using Node.js, Express, MongoDB, OAuth/JWT authentication, and FastAPI integrations. Computer Science graduate from KL University with a 9.0/10 CGPA.

TECHNICAL SKILLS

Frontend	React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind
Backend & APIs	Node.js, Express.js, REST APIs, Supabase, FastAPI (Python)
Databases	MongoDB, MySQL,Supabase
Languages	JavaScript, Python
Cloud & Data	AWS S3, Lambda, Glue, Redshift; Apache Spark

PROFESSIONAL EXPERIENCE

Full Stack Developer | Lovosis Technology Pvt. Ltd. — Bengaluru | May 2025 – Present

- Built and deployed 6+ production UI modules using React and Next.js, including server-side rendering, dynamic routing, and reusable component architecture.
- Integrated REST APIs and implemented Supabase authentication flows, reducing reliance on manual token handling and helping prevent authentication-related errors.
- Improved application load performance by 45% through code splitting, lazy loading, and image optimization.

Data Engineering Virtual Intern | AICTE + AWS Academy — Jan 2024 – Mar 2024

- Designed data pipelines using AWS S3, Lambda, Glue, and Redshift for simulated production environments.
- Processed and transformed 10K+ records using Python, SQL, and Apache Spark for automated data workflows.

PROJECTS

Lumen Library | Full-Stack Library Management System
Link - https://library-management-system-ten-phi.vercel.app/
Next.js, React, Node.js, Express, MongoDB, JWT, Google OAuth, GitHub OAuth, Cloudinary

- Built a library management platform with Admin, Librarian, and Student roles, using JWT and OAuth authentication.
- Implemented book borrowing and approval workflows, notifications, analytics dashboard, and cloud-based image management.
- Developed REST APIs and a responsive UI; deployed the application using Vercel and Render.

Video Summarization Tool | Offline Processing System
Python, FFmpeg, ffprobe, scene detection, keyframe extraction, NVIDIA NVENC

- Built an offline video-processing pipeline using scene detection and keyframe extraction to create condensed outputs.
- Reduced a reported manual workflow from approximately 2 hours to under 3 minutes; processed a 1h50m source into an approximately 41-minute output.
- Used GPU acceleration with NVENC to achieve reported 3–5× faster processing.

Genova | AI Image Generator
Link - https://genova-ai-image-generator.vercel.app/
Next.js, FastAPI, Python, Stable Diffusion API

- Built a full-stack AI image generation platform connecting a Next.js frontend to a FastAPI backend for prompt-based image generation.
- Implemented dynamic prompt handling, asynchronous requests, and loading states to keep the interface responsive during model inference.

EDUCATION

B.Tech in Computer Science Engineering | KL University, Hyderabad — Graduated 2026 | CGPA: 9.0/10
